

Caddy

**Caddy
Fold N Drive
by AFIKIM**

Caddy has brought mobility to 21st century. Clever, practical and stylish, it's one of the most practical scooters on the market. Caddy has stunning good looks and increased user friendliness; part of its design brief was to make it as light as possible, hence the use of aluminum in its frame. Lightweight and portable, but also strong and comfortable.

Caddy has two unique systems; it folds instantly to go into a car trunk, or it can be taken apart in seconds if necessary, to fit into an even smaller locker. It's so easy, anyone can do it; even the wheels are push button release. These elements combine to take Caddy to a new level in portable scooter design.

Caddy has a range of up to 20 km. Plenty of legroom for all users and a stable secure base making the Caddy your best choice.

Can be taken apart in seconds.

Tiller and seat fold with ease

Unique ability to stand upright occupying less than 2 sq ft of floor space.

SPECIFICATIONS

Length	43"	Max speed	7 km/h
