

PARTNER IV

SIMPLY AMAZING

Showing the same amazing look and design than the successful PARTNER III, here is the PARTNER IV. Eagerly awaited and a natural progression, its highly impressive features include the very latest electronic control technology, fully active adjustable suspension on all wheels and enough power and to take you almost anywhere.

With a totally orthopedic adjustable seat, high rear wheels and a high ground clearance, the PARTNER IV is perfect for shopping or long country runs. It is perfect to negotiate sidewalks or roads in bad condition. It also can carry up to 425 lbs at a speed of 16 km/h with a range up to 40 km.

With a German technology, the PARTNER IV has all its equipment available at fingertips: automatic brake, complete light system including brake lamps, and many other features normally seen on cars or motorcycles.

Driving a PARTNER IV is every bit as good as you would expect from its pedigree; light positive steering with acceleration and braking perfectly balanced.

With its fully active adjustable suspension, a highly dynamic stability and a smooth and quiet operation the PARTNER IV is the most advanced and comfortable scooter on the market.

- Length : **61"**, Width : **27"**
- Weight with batteries : **155kg – 340lbs**
