

PARTNER III TOURING

HANDLING AND STABILITY

With its oversized rear wheels and its fully adjustable active suspension, the PARTNER III TOURING is simply the most stable and comfortable three wheel scooter on the market. Its wide rear end provides a safe ride on any kind of road.

The PARTNER III TOURING can make sharp turns in small areas. It redefines standards of handling and stability.

The orthopedic seat, equipped with fully adjustable backrest and armrests, is extremely comfortable. The large alloy wheels and very high ground clearance, coupled with a high duty power unit allow the PARTNER III TOURING to take you anywhere. It also can carry up to 400lbs at a speed of 16 km/h with a range up to 40 km.

With a German technology, the PARTNER III TOURING has all its equipment available at fingertips: automatic brake, complete lights system including brake lamps, and many other features normally seen on cars or motorcycles.

The PARTNER III TOURING is the safest and the most well equipped electric three wheel scooter. It is very advanced and way ahead of the competition. It is in a class of its own in term of design, comfort, equipment, suspension, steering and safety.
