

SUPERLIGHT

- > Great traction and power
- > Comfortable fully adjustable padded seat
- > Generous legroom equivalent to that of much larger scooters
- > Wide wheelbase making it very stable and sturdy
- > Highly manoeuvrable and incredibly tight turning circle

Design to disassemble quickly

Superlight is a powerful indoor and outdoor mobility scooter. It is able to turn almost in its own length making it ideal for indoor use. The rear wheel drive system gives the Superlight greater traction on all surfaces. Its 24 inch width gives it the ability to travel through most doorways and yet retain tremendous stability.

Superlight is still unbelievably simple to dismantle. Within seconds it will dismantle and be stored in the boot of your car. There is a top speed of 8km/h and a range of up to 20 km per charge.

Superlight has easy to use controls, switches for lights and horn, and removable ON/OFF key switch for security. Driving and parking brakes are both automatic. Forward and backward seat adjustment, as well as height, plus 360 degree swivel and folding armrests for easy entry and exit all contribute to the overall comfort.

Superlight is the best lightweight portable scooter on the market and comes to you with the confidence of Afikim many years experience in design, manufacture electric vehicles and assurance of market leading 2 year warranty.
